3 days programme on  
**Advanced MS-Word and MS-Excel Training**  
(7 – 9 August, 2017)

#### RATIONALE

A spread sheet looks a lot like a table which one might see in any word processing package, but it has some very important features that most tables do not. The first is that it is designed to make repetitive and/or complicated calculations very easy to carry out. Secondly, most spreadsheet programs have advanced graphing capabilities that make producing graphs from the data on the spread sheet relatively simple. While Excel is a very popular spreadsheet programme, it is by no means the only one that will do the job. Excel and Word are the programs which are very powerful applications with far too many features to learn as Management Information System (MIS) and for simple office usage. Microsoft Office functions most useful to the Managers in their job. Microsoft Excel is programme designed to efficiently manage spreadsheets and analyze data also. It contains both basic and advanced features that anyone can learn. Once some basic features are known, learning the advanced tools become easier. This training programme is designed with some basic and advanced MS-Excel and Word features. It assumes very basic prior knowledge of Excel and Word.
